Innovation for Our Energy Future

OpenEI.org: Sharing the World's Energy Information

Debbie Brodt-Giles
Stuart Macmillan
Jamey Wood
February 16, 2011

The Energy Challenge

*How do we meet the growing demand
for energy while protecting the planet?*

Adapted from S. Benson 2010

The Collaboration Challenge

We tend to gravitate to familiar SILOS

A Clean Energy Commons

Voluntary public resource, created by private agreements

“small parts loosely joined”

*Shared standards
Shared infrastructure
Democratized access
Rights to the user*

A commons can out-innovate closed systems

1. Improved access to energy-related information

2. Community support for contributions and collaboration

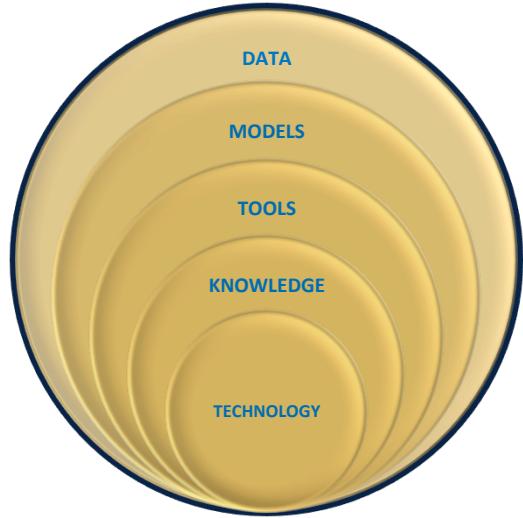

3. Easy, legal, and scalable sharing

4. Actionable assessments of information quality and provenance

What's In The Commons?

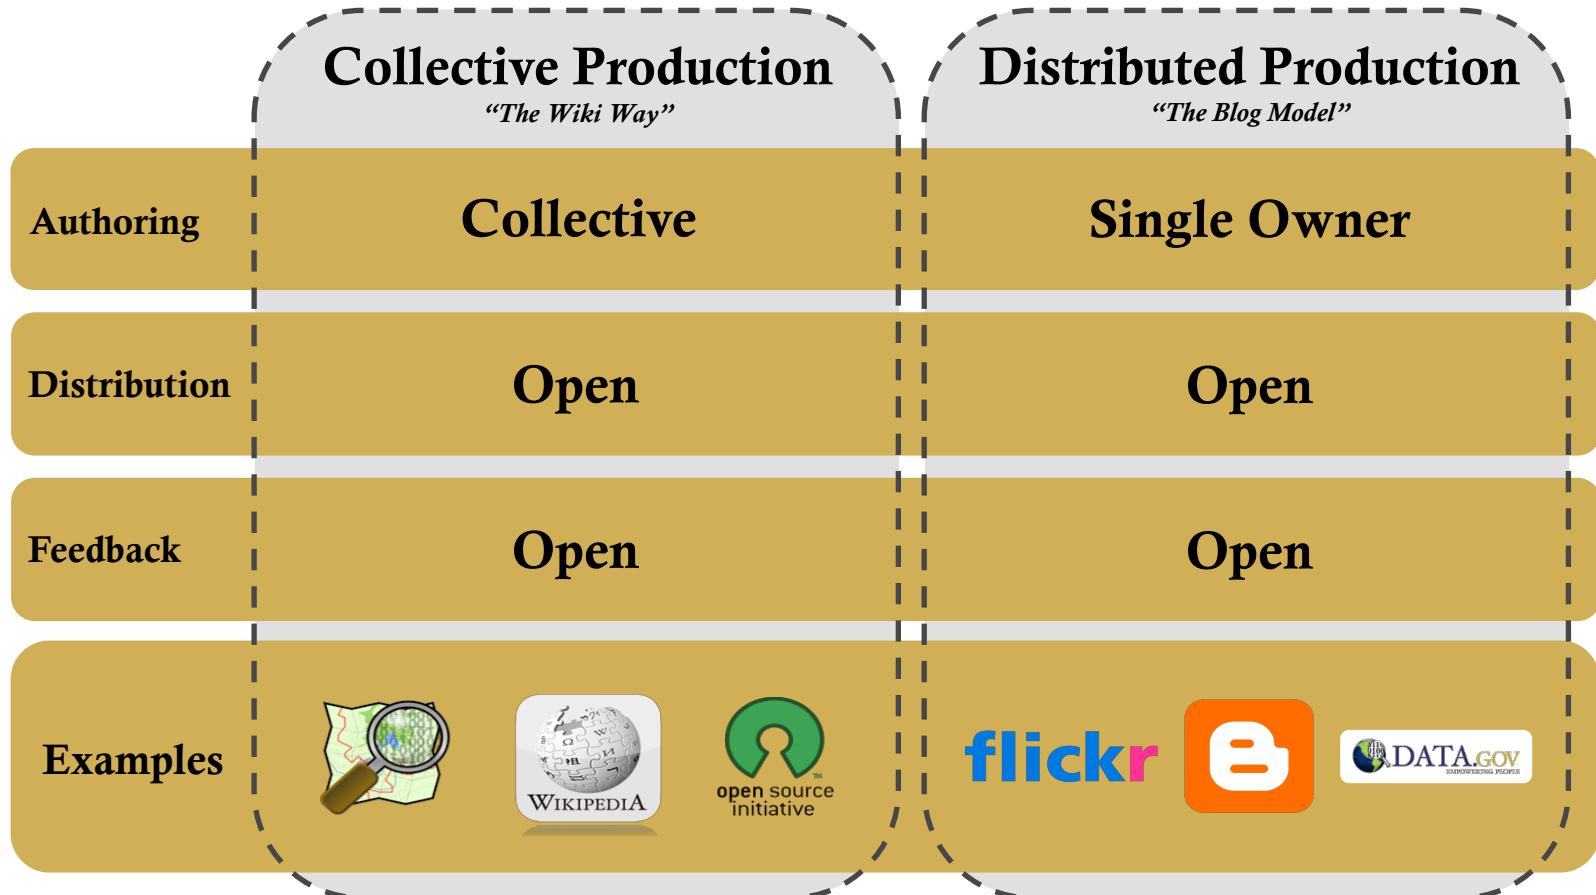

The slide features six cards arranged in two rows of three. Each card has a blue header and a small image of a related tool or document.

- Energy Data**: Shows a wind rose with arrows indicating wind direction and speed, with a central digital display showing "28.5".
- Energy Tools**: Shows a map titled "PV Installation Mapping" with various data overlays and a timeline at the bottom.
- Energy Docs**: Shows a screenshot of a document with text and images, including a photograph of a solar panel array.
- Energy Maps**: Shows a map of the United States titled "Photovoltaic Solar Resource" with color-coded regions representing solar potential.
- Education**: Shows a screenshot of a presentation slide titled "SOLAR POWER" with text and images.
- Energy Models**: Shows a screenshot of a complex simulation interface with multiple graphs, charts, and data inputs.

OpenEI: Background

- **Dec 2009:** DOE issues press release to launch OpenEI as its Open Government Initiative
- **April 2010:** OpenEI recognized by the White House as a flagship open government initiative
- **April 2010:** DOE releases its Open Government Plan, which highlights OpenEI
- **December 2010:** OpenEI is featured in the WhiteHouse.gov Open Government Innovations Gallery
- **Ongoing:** Significant attention related to these announcements including USA Today, blogs, and recognition from the Linked Open Data community

The screenshot shows the WhiteHouse.gov Open Government Initiative page. At the top, there's a navigation bar with links for BLOG, PHOTOS & VIDEO, BRIEFING ROOM, ISSUES, the ADMINISTRATION, the WHITE HOUSE, and our GOVERNMENT. A search bar and a "Search" button are also present. Below the navigation, there's a banner for the Open Government Initiative, followed by sections for About Open Government, Open Gov Blog, Around the Government, and Innovations Gallery. A prominent section titled "Fact Sheet: Open Government Flagship Initiatives" contains text about the Obama administration's plans for transparency, participation, and collaboration across all government agencies.

White House and DOE Open Government Initiative

OpenEI: Selected Quotes

“This information platform will allow people across the globe to benefit from the Department of Energy’s clean energy data and technical resources. The true potential of this tool will grow with the public’s participation – as they add new data and share their expertise – to ensure that all communities have access to the information they need to broadly deploy the clean energy resources of the future.”

Dr. Steven Chu, Secretary of Energy
<http://energy.gov/news2009/8381.htm>

“Wow ... Energy linked data portal”

Tim Berners-Lee, Inventor of the World Wide Web
http://twitter.com/timberners_lee/status/7062198463

“Love that DOE is doing OpenEI.org”

Tim O'Reilly, Web 2.0 Pioneer and Founder of O'Reilly Media
<http://twitter.com/timoreilly/status/11792155576>

OpenEI: Current Resources

Clean Energy Economy

- Companies
- Networking Organizations
- R&D Organizations
- Investor/Financial Organizations
- Policy Organizations
- Generation Facilities
 - Biomass Facilities
 - Geothermal Facilities
 - Solar Power Plants
 - Wind Farm

Smart Grid

- US Recovery Act Smart Grid Projects

Incentives

- EE/RE Incentives (*from dsireusa.org*)

Buildings Gateway

- Utility Rates Database
- Utility Companies (*from EIA*)
- Utility Sales & Revenue Data (*from EIA*)
- Climate Zones

Solar

- Resource Maps and Tools

US Open Labs

- Software Tools
- Research Groups
- Scientific Data
- Educational Materials
- Renewable Energy Resources
- Policies and Programs
- Climate Change
- Exploring Impacts

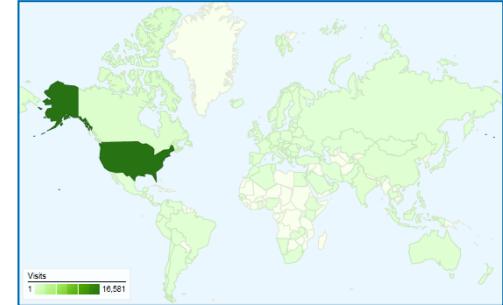

International

- Renewable Energy Resource Potential
- Project Screening and Design
- Energy Scenario Analysis
- Economic and Environmental Impacts
- Policy and Program Design
- Financing Options
- Technology Performance and Costs
- Learning Resources and Networks

OpenEI: Community & Statistics

OpenEI was launched on September 20, 2009

- More than **280,000 web visits** from **190 countries**
- Creation of over **300 datasets**
- Creation of over **42,000 content pages**
- Upload of over **3,400 images** and other files
- A total of more than **350,000 contributor actions**
- Over **220,000 unique visitors**
- More than **2,200 registered users**
- Over **7,000 Twitter followers**
- More than **350 Facebook fans**
- Over **2 million RDF triples**

Screenshot of the OpenEI.org Facebook page. It shows 200 fans, a post about energy efficiency and renewable energy incentives, and a post about California's Grid Integration. The page has 2,200 likes.

Screenshot of the OpenEI.org Google+ page. It shows 200+ members, a post about reaching 200 fans on Facebook, and a post about the Obama administration's energy policies. The page has 7,000+ members.

OpenEI: Concept and Components

Distributed Production

<http://en.openei.org/datasets>

- Web-based submission process
- Contributor-only write access
- Open read access
- Open commenting and rating
- Scalable distributed storage

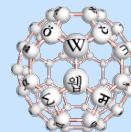

Early Access

Collective Production

<http://en.openei.org/wiki>

- Semantic Wiki
- Open write access
- Open read access
- Forms-based authoring

Open Distribution

<http://en.openei.org/sparql>

- SPARQL Endpoint
- Linked Open Data (RDF/HTTP)
- Named Graphs for Segmentation

OpenEI: Collective Production Example

<http://en.openei.org/wiki>

Peered Production

"EIA does not collect or publish data on electricity rates, or tariffs, for the sale or purchase of electricity, or on demand charges for electricity service, nor does EIA publish retail electricity rates or prices for peak or off-peak periods (sometimes referred to as time-of-use-rates). ... EIA is not aware of a publicly available source for this information other than individual utilities."

EIA Electricity FAQ

http://tonto.eia.doe.gov/ask/electricity_faqs.asp#electric_rates

Response: Crowdsourced Data Entry

Smart Grid: Toward a Transparent Energy Marketplace

A regional mashup of 7 cities

Milwaukee, Wisconsin

Census
Median Income: \$32,216
Housing Units: 249,225
Homeownership Rate: 45.3%

Incentives
[View incentives](#)

Smart Grid Information
[Milwaukee Smart Grid information](#)

Utility Information
Utility Company Name: [Wisconsin Power & Light Co](#)
Time of use rate data
Avg residential kWh usage per year: 10560
Avg kWh cost in state: 0.1152
Estimated electricity cost per resident (kWh usage x cost of kWh): \$1216

Sources used: 2005 EIA Residential Energy Consumption Survey on Data.gov via tw.rpi.edu, OpenEI.org, U.S. Census data, SmartGrid.gov

Smart Grid: Toward a Transparent Energy Marketplace

"A smart grid is socially transformational. As with the Internet or cell phone communications, our experience with electricity will change dramatically...."

Reference: [Smart Grid System Report, U.S. Department of Energy, July 2009](#)

Modeled after the [National Renewable Energy Laboratory Alternative Fuels and Advanced Vehicles Data Center](#), this mashup is an evolving collection of Smart-Grid tools, database searches, calculators, and interactive maps to enable consumers to become an integral part of the electric power system.

[Assumptions](#)

OpenEI: Open Questions

- **Participation Barriers**

- **Licensing**

- Having a license (CC Zero) that's more open than Wikipedia's (CC Attribution-Sharealike) means we cannot allow direct imports of Wikipedia content. Should we just align with them? Or adopt a split approach for textual content versus structured data?

- **Registration**

- Should we allow anonymous edits within the OpenEI Wiki?

- **User Experience and Learning Curve**

- **Motivators**

- **Career Advancement and Recognition**

- Academic Tenure
 - Simple Virtual Rewards (points, badges, “karma”)

- **Mandates**

- Open Government Initiative

- **Financial Gain**

- Value-add goods and services
 - Micropayments

- **Public Funding**

OpenEI: TODO List

- **Critical Mass**

- Content
- Community

- **Processes and Culture**

- Participation Motivators
- Curation Practices

- **System Capabilities**

- Improved “Datasets” Mechanism
 - Versioning
 - Format translations
 - File-level hierarchy and metadata
 - File type wizards
- Audience-Specific Tools
 - Traditional Analysts
 - Excel Integration
 - Traditional Developers
 - RESTful Interfaces
 - Data Processors
 - MapReduce Access
- Resource Clustering
- User Experience Improvements
- Partially Protected Data*
 - Implement via sibling project(s)?
